

EuroClad

EuroClad is a unique, pre-finished composite timber cladding system with a beautiful wood-grain embossed surface. Designed for stability and longevity with premium style, EuroClad offers a sustainable timber alternative that is eco-friendly and virtually maintenance free. With its lightweight tongue & groove profile and pre-drilled panels, it makes installation a breeze.

EuroClad can be installed either horizontally or vertically and is available in six natural wood colours with a comprehensive 15 year warranty for peace of mind.
