

# Titan Board

## Product Range - Signage Solutions

### Overview

PSP Titan Digital Print Board consists of a triple layer skin on both sides with an extruded polystyrene foam core. The first layer of aluminium provides the strength and rigidity where the middle layer of paper gives the panel a white surface. The final layer of polyethylene laminate provides a smooth surface delivering outstanding printing results. It is a strong and lightweight product making it the ideal solution for POS display projects. Available in 2440mm x 1220mm & 3050mm x 1500mm sheet sizes in 5mm, 10mm and 20mm (sold in packs only).
